Briefing

In het kader van een project rond gezonde slaapgewoontes bij jongeren, wordt vanuit de onderzoeksgroep 'Gezondheidsbevordering' aan de UGent momenteel een interventie ontwikkeld die gezonde slaap wil promoten. Momenteel nemen 7 Vlaamse scholen deel aan dit project (3 als interventieschool, 4 als controleschool). De inhoud van de interventie ter promotie van gezonde slaapgewoontes, wordt samen met de doelgroep bepaald, er wordt in dit project namelijk gedoeld om op maximale wijze participatief te werk te gaan.

Van de jongeren werd vernomen dat ze heel graag een app zouden ontwikkelen, die hen kennis over slaap bijbrengt maar ook stimuleert om hun smartphone/tablet minder te gebruiken voor het slapengaan.

Dit wordt geraliseerd doormiddel van een Angular Progressvie Web App die gevoed wordt door een Drupal 8 backend.

Requirements:

- Gebruiker
 - Login & registratie
 - Gebruikers profiel met foto, naam, school
 - Slaapdoel opstellen
 - Type slaper bepalen via quiz
- Vrienden
 - Lijst van vrienden op een interactive map weergeven
 - Vrienden profiel met openbare gegevens
- Slaap tracker
 - Dagelijkse mogelijk tot ingeven
 - Hoe laat gaan slapen/opgestaan
 - rating van 0 5 omtrent diepte van de slaap
 - rating van 0 5 omtrent hoe uitgerust je bent
 - Dagelijkse melding om die meld wanneer je moet gaan slapen
 - statistieken
- Tips en Tools
 - verschillende categorieën
 - filmpjes om tot rust te komen
 - tips om beter te slapen
- Fotowedstrijd
 - sorteermogelijkheid
 - overzicht alle foto's
 - upload van foto met hastag
 - mogelijkheid om foto terug te verwijderen
 - foto kan gelikedworden
 - aantal likes moet zichtbaar zijn

Deliver Handleiding

Registratie

De gebruiker deelt naam, locatie school en wachtwoord mee. Na de registratie begint de Quiz om de gebruiker zijn slaapprofiel vast te stellen.

Alle gegevens binnen de applicatie zullen gelinkt zijn aan de school die hier werd opgegeven.

Login

Na het inloggen komt de gebruiker op een welkomstscherm. Daar wordt meegedeeld hoe de afgelopen nacht verliep en hoeveel likes zijn deelname voor de wedstrijd ondertussen heeft.

Onderaan staat een menu waarmee de rest van de toepassing te bereiken is

User

Op de gebruikerspagina vindt de gebruiker zijn gegevens terug. Hier kan hij bepaalde gegevens wijzigen alsook de quiz opnieuw nemen voor het slaap profiel opnieuw in te stellen.

Vrienden

Op de vriendenpagina krijgt de gebruiker een lijst met bijbehorende map waarop die hun locaties te zien zijn. Hier kan men doorklikken naar een lijst van medestudenten om nieuwe vrienden toe te voegen.

Elke vriend heeft zijn eigen detailpagina.

Slaap tracker

Via de slaap tracker heeft de gebruiker dagelijks details over zijn slaap in. de tijd wanneer deze is gaan slapen alsook de tijd van het opstaan.

Hier wordt ook door middel van sliders scores gegeven omtrent de diepte van de slaap, in welke mate de gebruiker is uitgerust en een algemene score van de nacht.

Tips & Tools

De tips & tools pagina is een verzameling van artikelen, tips filmpjes en memes

Wedstrijd

Op de wedstrijdpagina worden alle wedstrijd inzendingen weergegeven met de gebruiker en aantal likes. Van hieruit kan men naar het swipe onderdeel van de wedstrijd waar gebruikers hun stem kunnen uitbrengen. Als ook een optie om een nieuwe foto aan de wedstrijd toe te voegen.

Deploy

- 2. Update de gegevens in "sites/default/settings naar die van de online database
- 3. Upload alle inhoud van de public folder via ftp naar de root van de web server.
- 4. Exporteer de lokale database via drupal console of drush
- 5. Importeer deze export in de online database.
- 6. Pas alle API requests in het Angular project aan aan de nieuwe url
- 7. Run "ng build" en host de volledig gegenereerde dist folder op een webserver.
